Descrizione

Rooster All Purpose Boot

- DESCRIZIONE:

Caldi e protettivi, hanno una nuova suola molto flessibile con ottimo grip. Rivestimento felpato interno, zip super resistente e fascia protettiva interna che impedisce l'ingresso di acqua se lo stivale non viene completamente immerso.

Il supporto plantare e la suola spessa ma flessibile li rendono estremamente confortevoli.

- LAVAGGIO:

Consigliamo di lavare a mano con acqua calda e sapone. Lasciare asciugare all'aria.

- DESCRIPTION:

The design objective was to produce a boot that was warm, protective and easy to put on whilst giving the hiking support of a stiff rubber boot.

Technology - The super thick sole gives stability underfoot whilst easily retaining flexibility. The boots protective rubber coating provides increased wear and longevity. The real gem is the new anti-stretch neoprene that is used down the length of the boot. These woven crossfibres reduce stretch when hiking, keeping your foot fixed in position whilst still allowing stretch for comfort. The heavy duty zip has a neoprene gusset for comfort, whilst the zip is held up by a moulded Velcro tab and pad ensuring the boots stay fastened to your feet! Its fleece lining make putting the boots on over a dry suit foot as easy as using a plastic bag. Outstanding sole protection and toe support make this rooster dinghy boot a must for those sailing everything from hiking dinghies to trapezing skiffs.

- WASHING:

We recommend hand washing in warm soapy water or Mirazyme Odour Eliminator (see related items tab) and allowing to air dry.
